## ① HOW TO START FUJIYAMA TAP

### 1-1 INSTALL THE TELEGRAM APP

Please install the Telegram app on your iOS or Android smartphone.

**Install Telegram for iOS here▶**

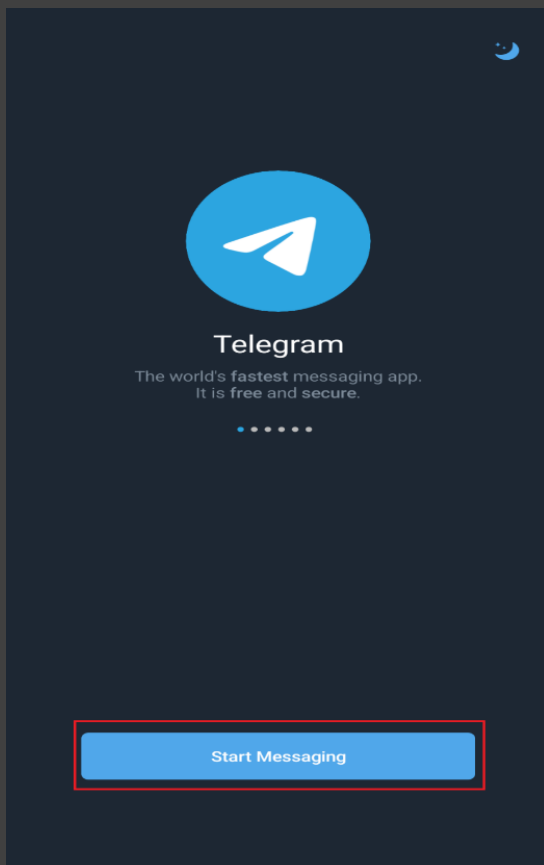

**Install Telegram for Android here▶**

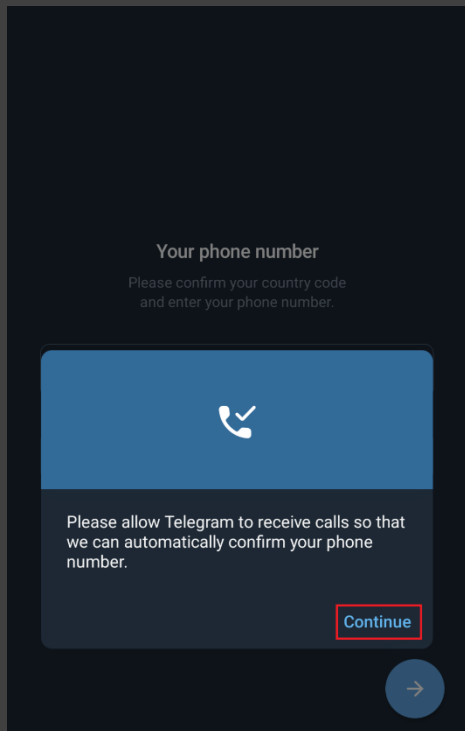

### 1-2 TELEGRAM INITIAL SETUP

① Press “Start Messaging”.

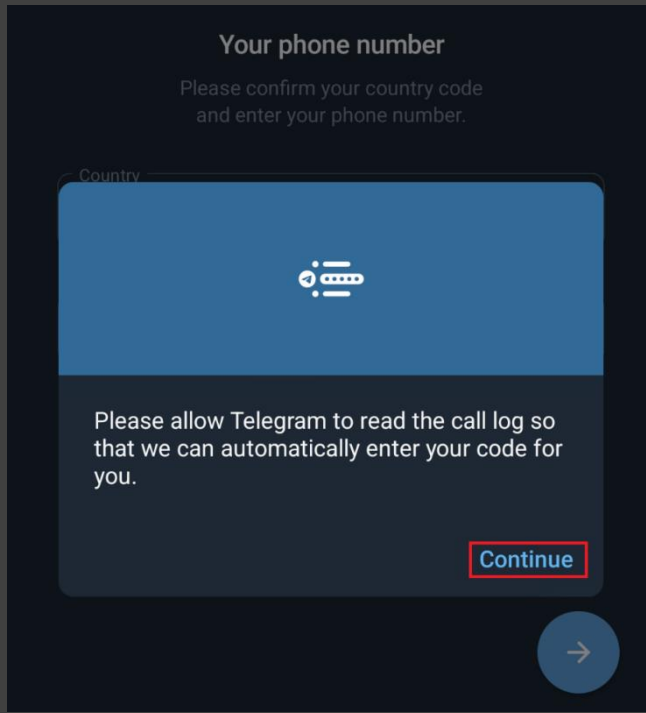

②Telegram will request permission to make and manage phone calls. After pressing the “Continuity” button, please press the permission button displayed on your smartphone.

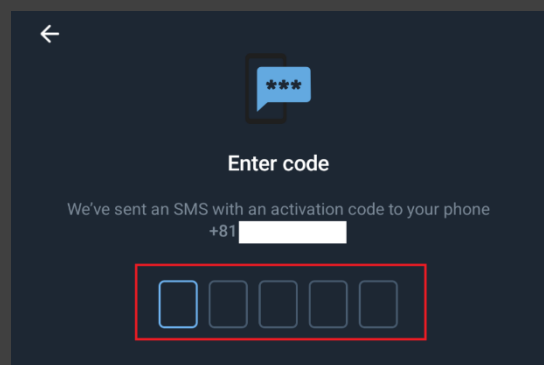

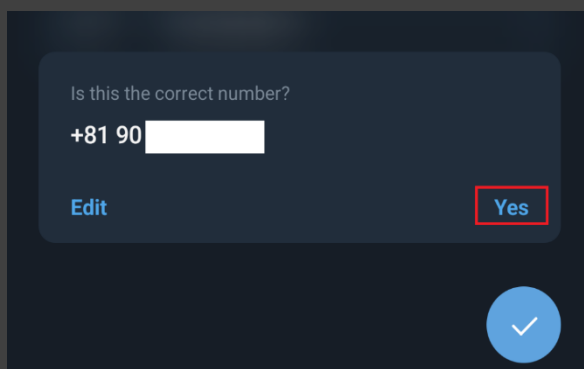

③Register your mobile phone number. Please register a phone number that can receive SMS.

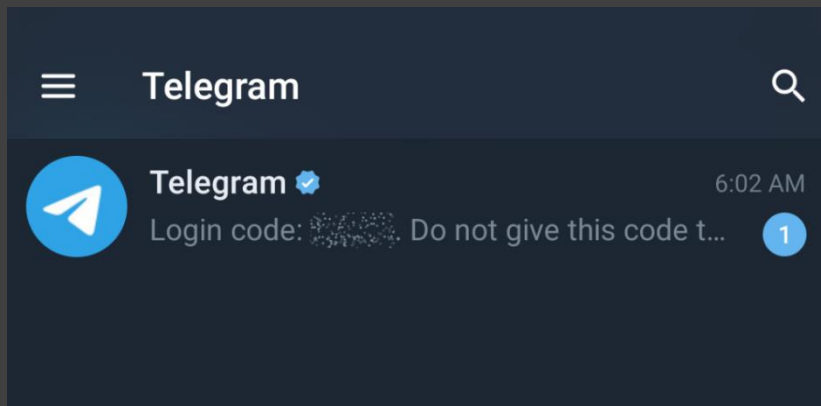

④ Telegram will request permission to access your call history. After pressing the "Continuity" button, please press the permission button displayed on your smartphone.

⑤ You will be asked to confirm the sending of the SMS verification code. After confirming the phone number to which the SMS will be sent, press the "Yes" button. Then, enter the verification code received into Telegram.

⑥When the Telegram top page is displayed, the initial setup is complete.

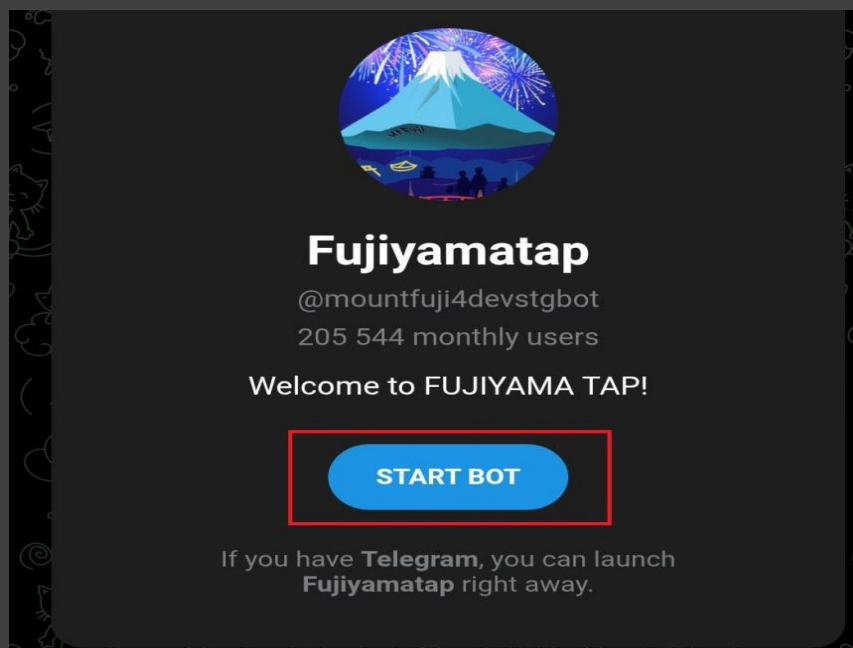

### 1-3 FUJIYAMA TAP MINI APP REGISTRATION

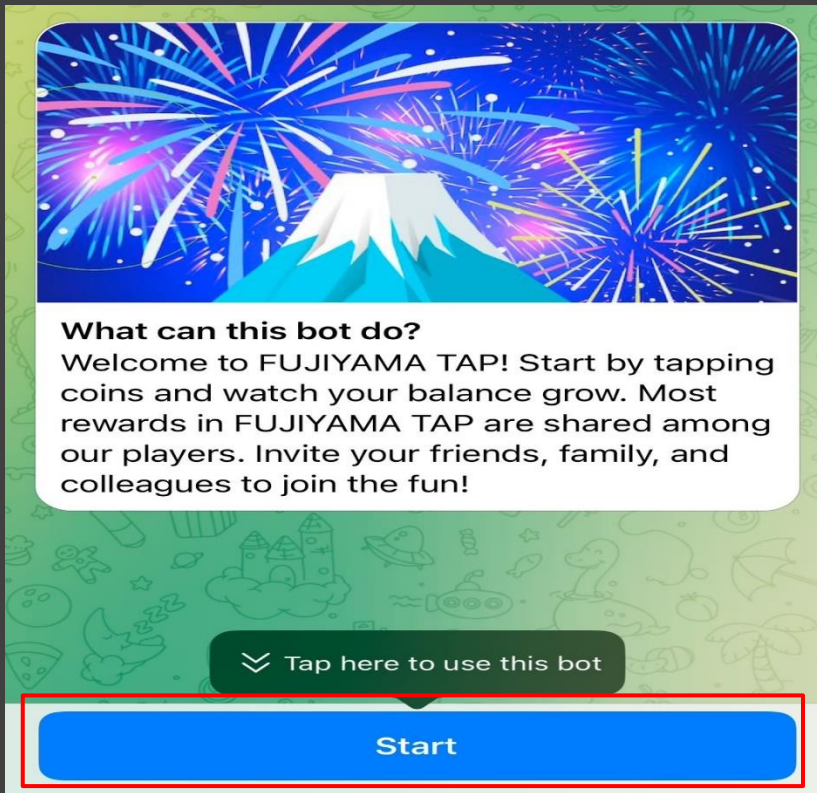

After completing the initial setup of Telegram, please register for the ["FUJIYAMA TAP"](#) mini app.

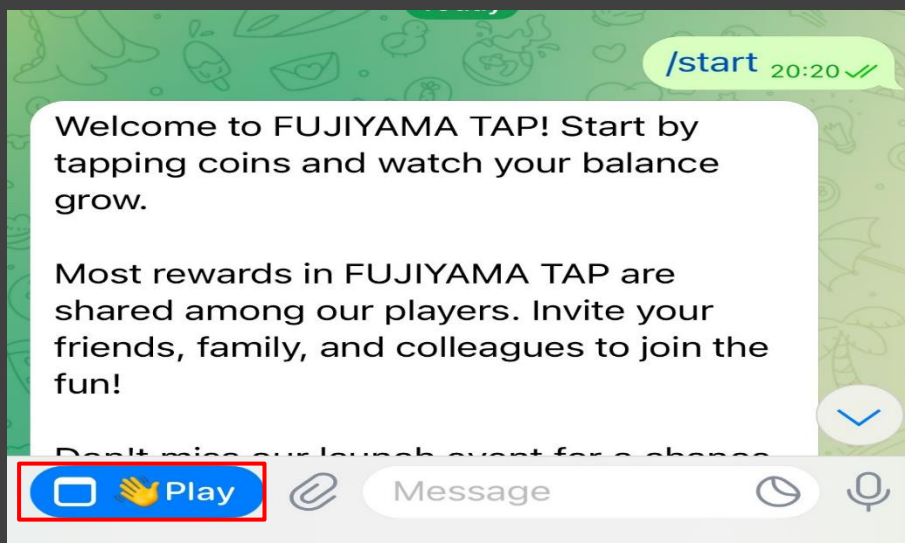

①Press "START BOT".

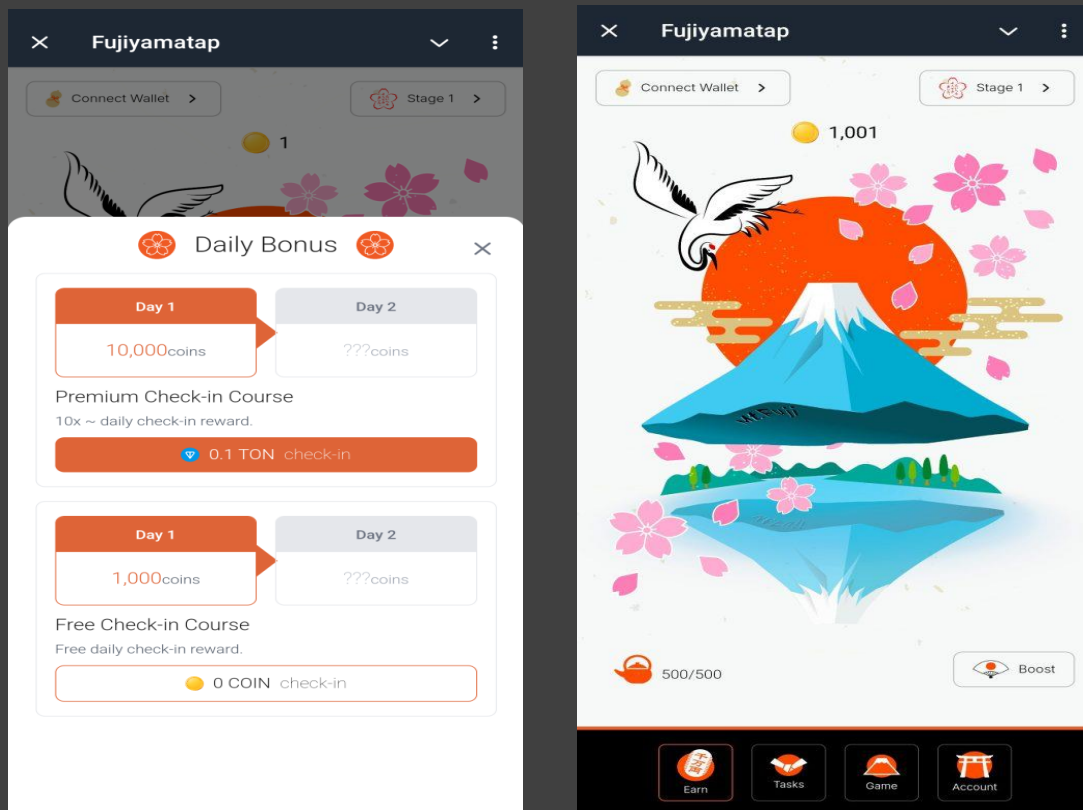

②The Telegram app will launch automatically. Press “OK”.

③Press the "Play" button and the "Start" button at the bottom left of the screen. This will be the entry point for playing "FUJIYAMA TAP" in the future.

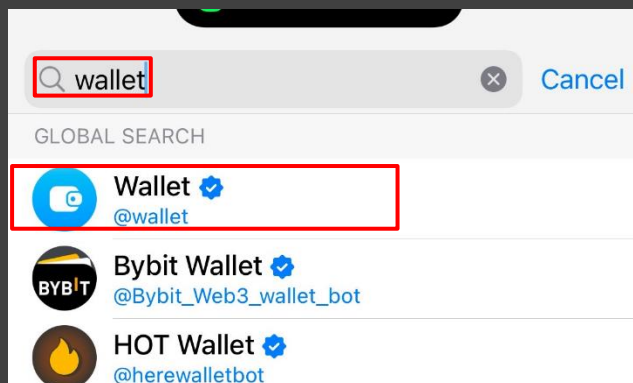

④ "FUJIYAMA TAP" will launch. Receive your daily bonus and tap the screen.

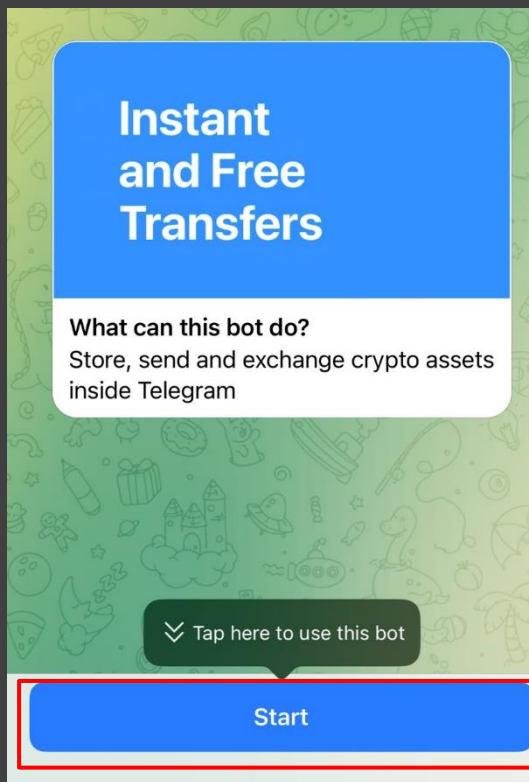

## 1-4 ADD WALLET FUNCTION

### 1-4-1 WALLET INITIAL SETUP

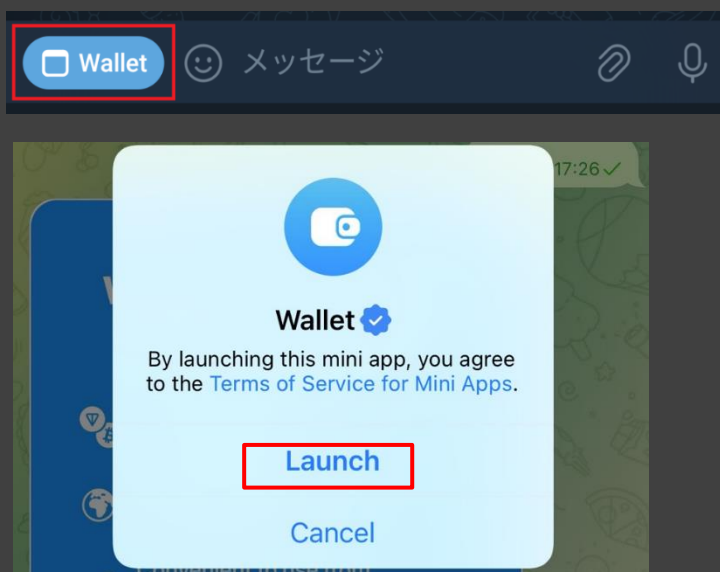

① Enter "wallet" in the search bar and select "Wallet" (@wallet) from the search results.

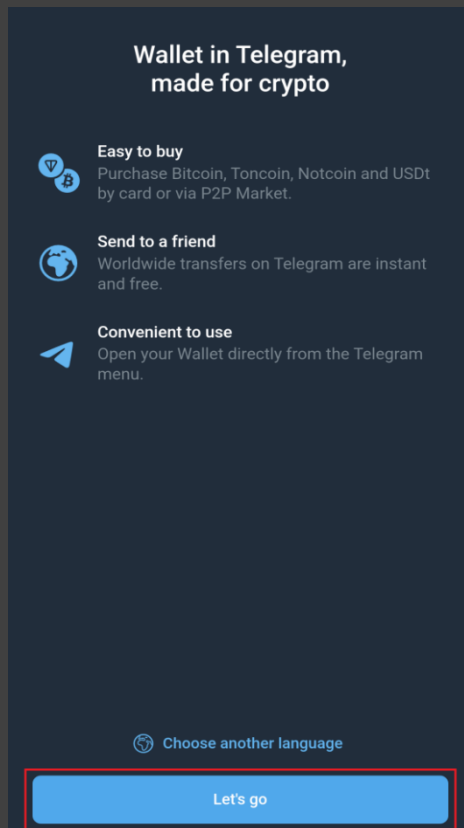

② Press "Start."

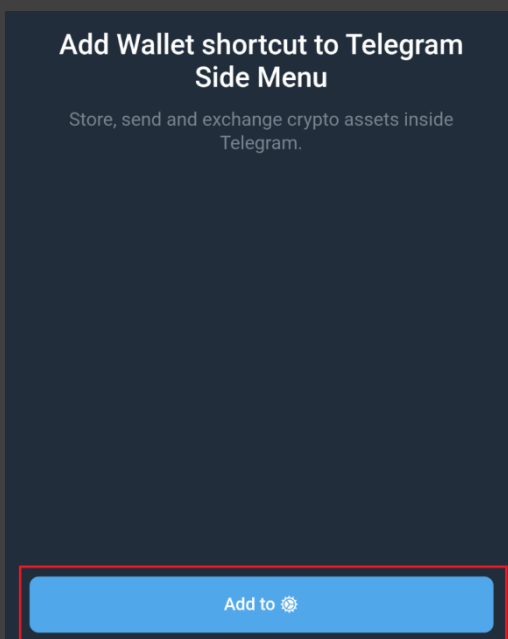

③ Press the "Wallet" button at the bottom left of the screen, then press the "Launch" button in the displayed message.

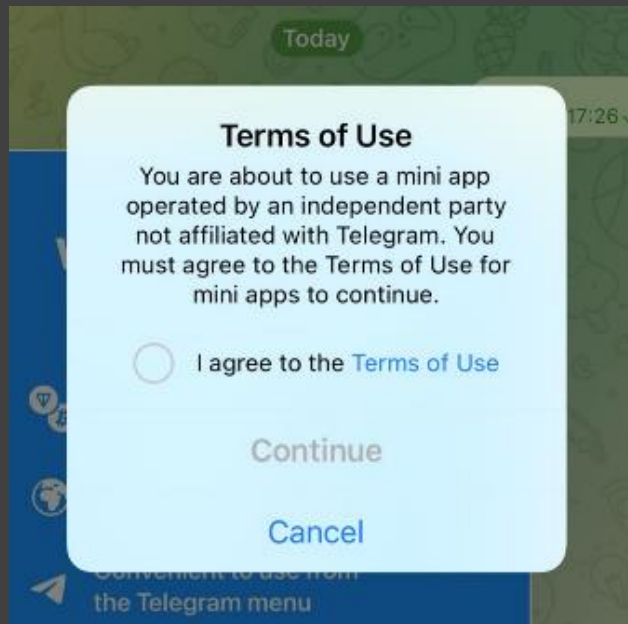

④After adding the wallet function to Telegram, press "Let's go."

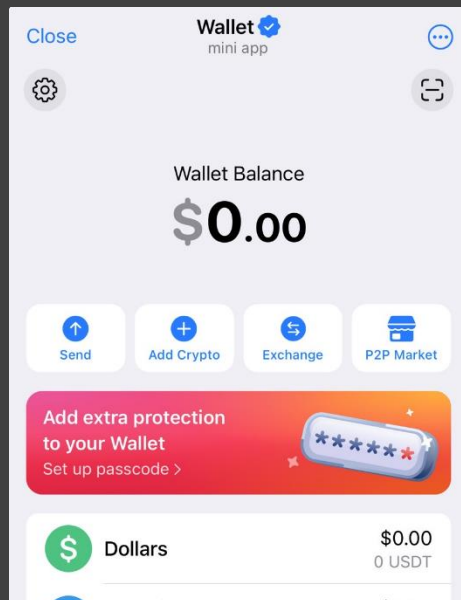

⑤Create a shortcut for the wallet in the Telegram side menu (three lines at the top left). Press "Add to."

⑥ Agree to the terms of use and press "Continue."

⑦ The wallet setup is complete.

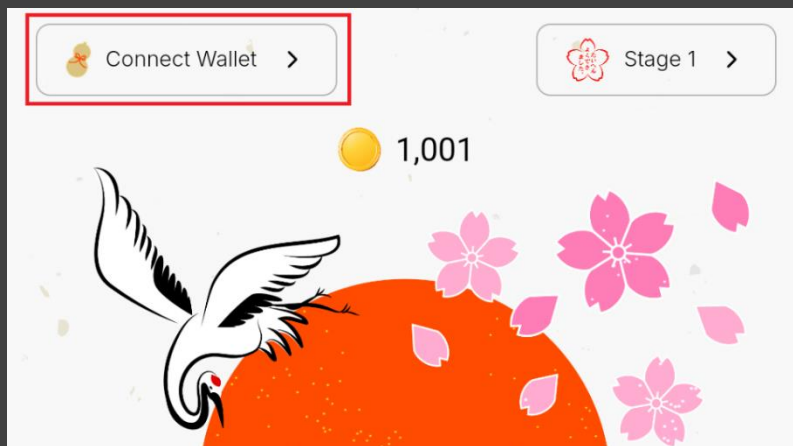

---

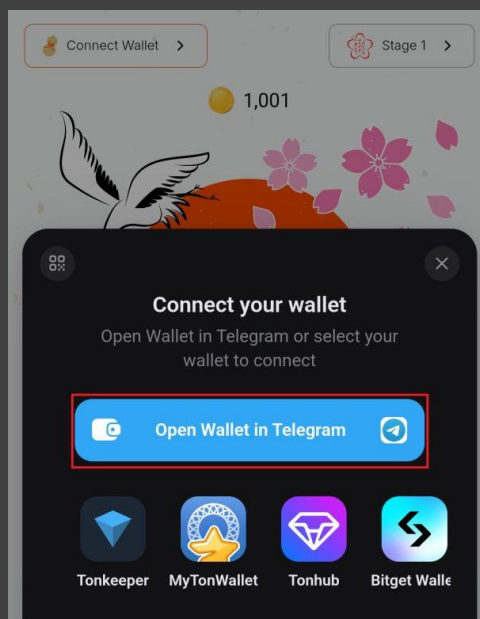

## "FUJIYAMA TAP" INTEGRATION SETTINGS

To use Toncoin (TON) for in-game purchases or receive AirDrop in the future, you need to link the "FUJIYAMA TAP" with the wallet function of Telegram.

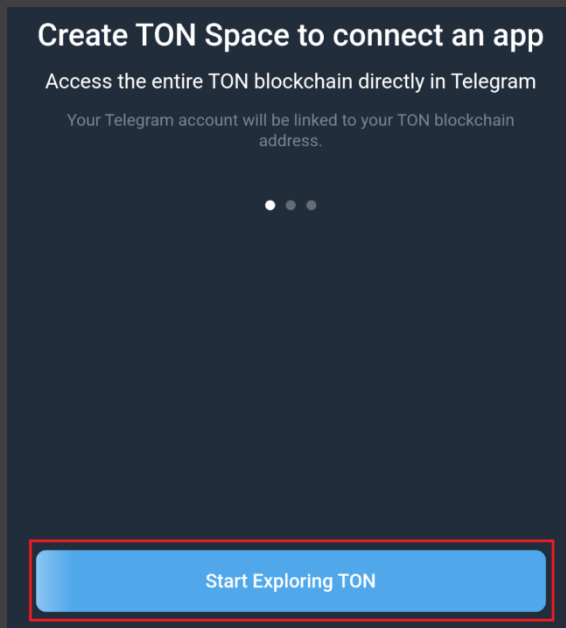

① Press "Connect Wallet" at the top left of the "FUJIYAMA TAP" home screen.

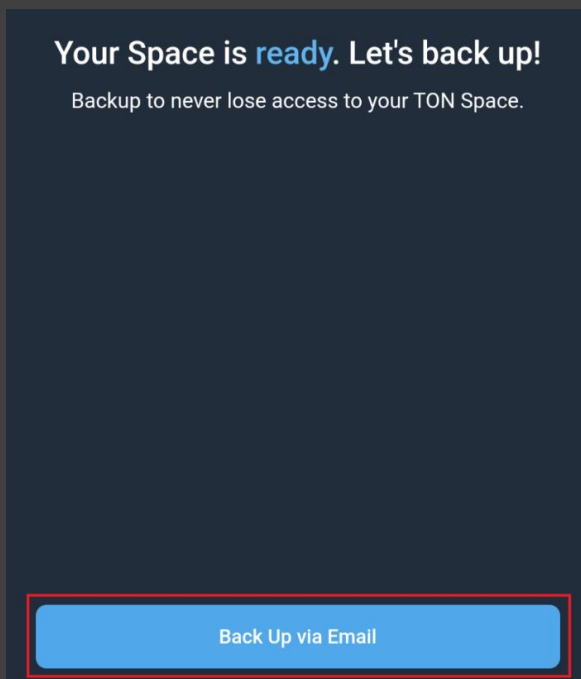

② Press "Open Wallet Telegram."

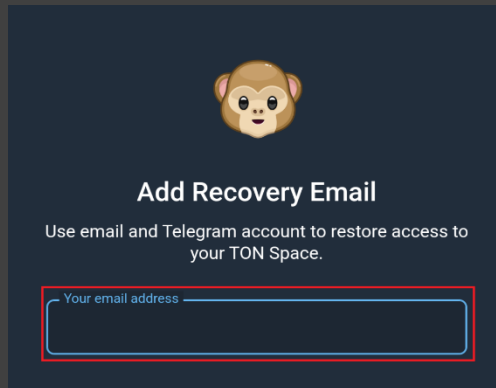

③ Create a space for Toncoin (TON) in the wallet. Press "Start Exploring TON."

④ To back up the Toncoin (TON) space, register your email address. Press "Back Up via Email."

⑤ Please enter your email address.

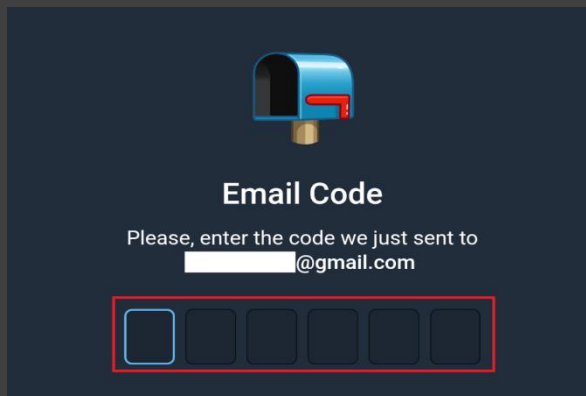

### Add Recovery Email

Use email and Telegram account to restore access to your TON Space.

Your email address

⑥ A verification code will be sent to the registered email address. Please enter the received code.

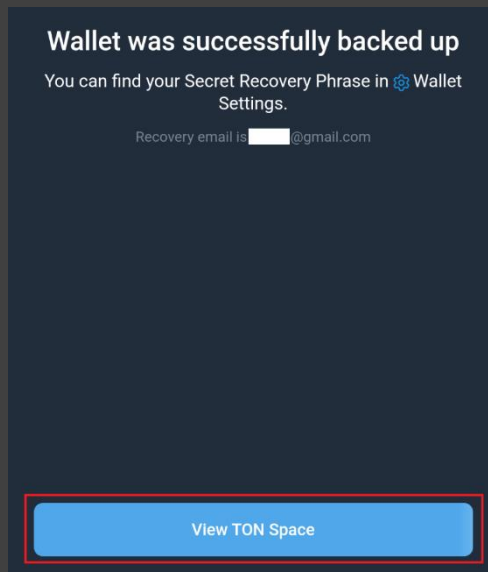

### Email Code

Please, enter the code we just sent to [redacted]@gmail.com

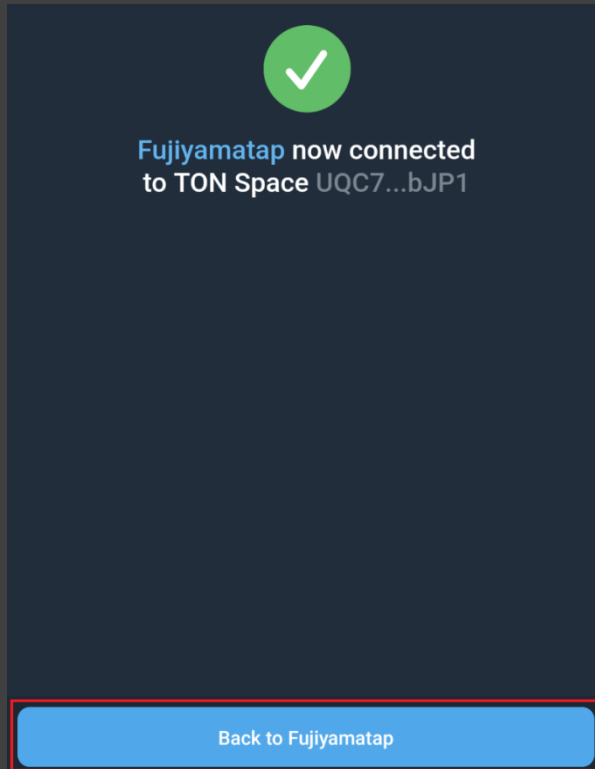

⑦ After verifying the confirmation code, press "View TON Space."

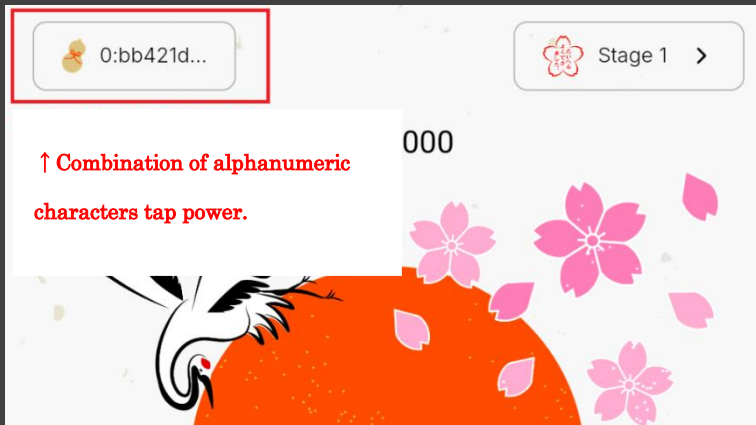

⑧ You will be asked to confirm the connection between FUJIYAMA TAP and the wallet. Press "Connect."

⑨After completing the integration settings, press "Back to Fujiyamatap."

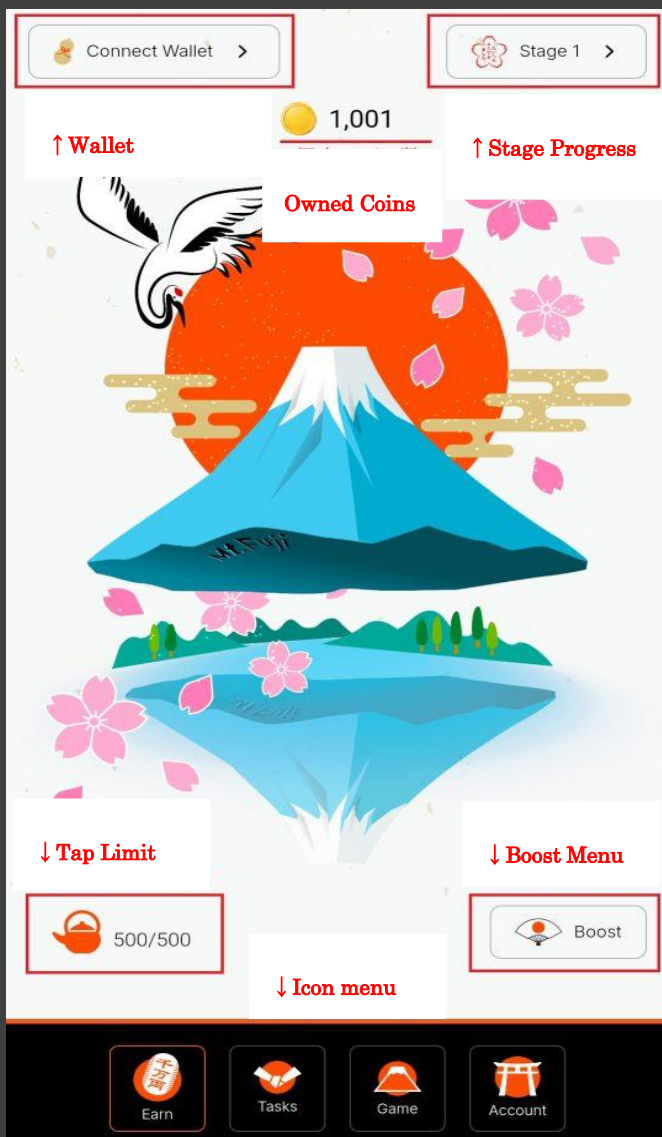

⑩Once the integration is successfully completed, the "Connect Wallet" button at the top left of **"FUJIYAMA TAP"** will change to display the wallet address (a combination of alphanumeric characters).

## 1-5 ADD WALLET FUNCTION

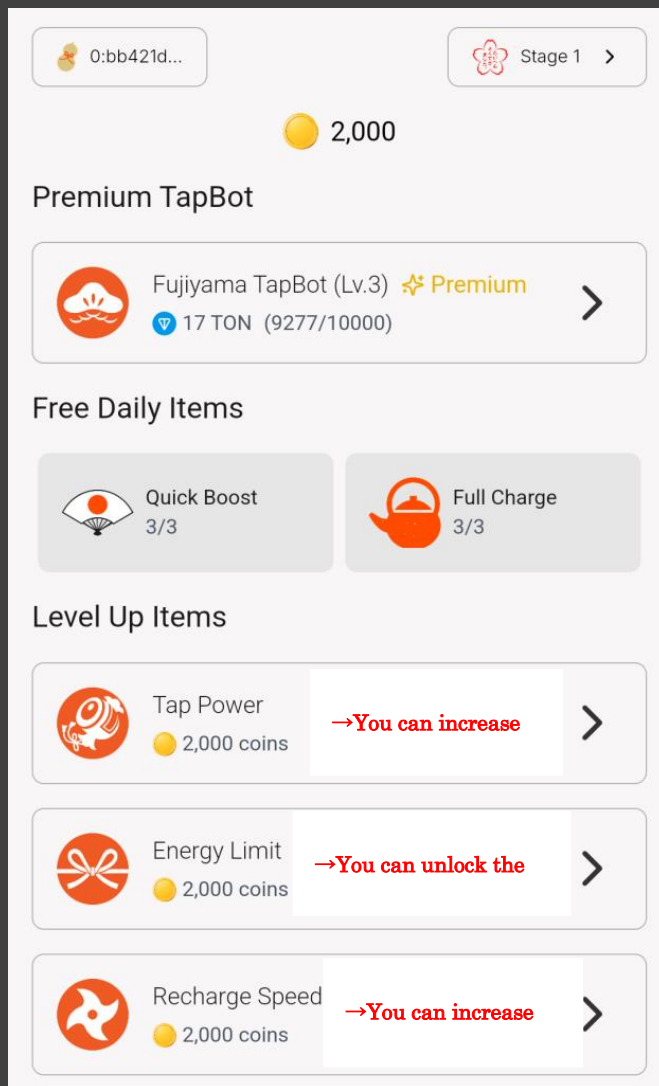

You can earn FUJIYAMA coins simply by tapping the screen. In the initial stage, you only get 1 coin per tap, so use "Boost" to increase tap efficiency and complete "Tasks" to get bonus coins.

**"FUJIYAMA TAP"** Refer to the following instructions to understand the home screen layout.

## INCREASE TAP EFFICIENCY WITH "BOOST."

The main strategy is to use the coins accumulated with "Boost" to level up "Tap Power." Additionally, you can increase the tap limit with "Energy Limit" and improve the tap recovery speed with "Recharge Speed."

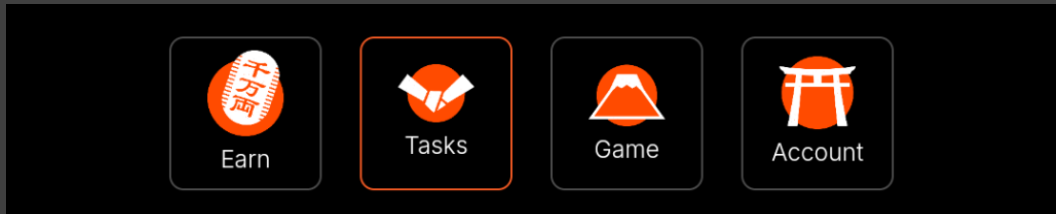

"Quick Boost" is a feature that increases tap power by 5 times for 20 seconds, up to 3 times a day for free. "Full Charge" is a feature that restores the tap limit to its maximum value, up to 3 times a day for free. Utilize these free Boost features to efficiently accumulate coins.

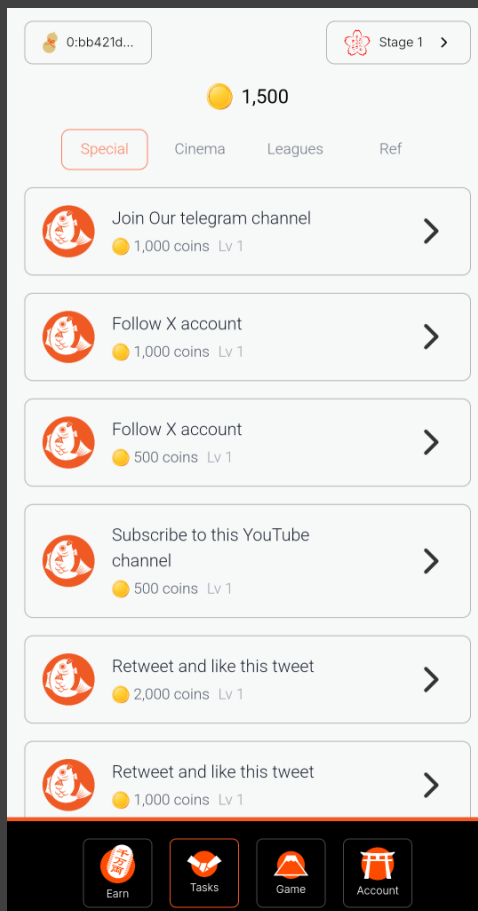

---

## GET BONUS COINS WITH "TASKS."

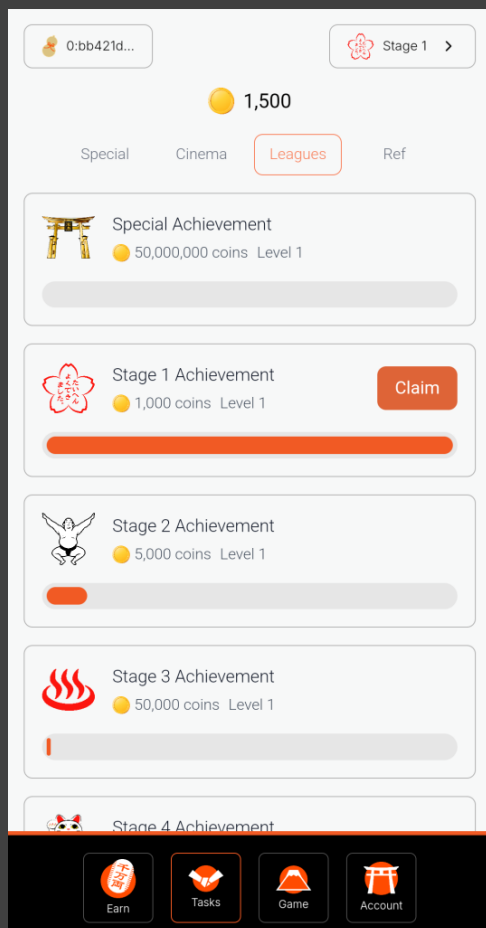

You can earn a lot of FUJIYAMA coins from the "Tasks" menu. "Tasks" is included in the icon menu at the bottom of the screen.

At the beginning of the game, you can easily earn FUJIYAMA coins by participating in "Special" tasks such as joining Telegram channels, following on X (formerly Twitter), subscribing to YouTube channels, and retweeting on X (formerly Twitter). By completing all tasks, you can earn up to 20,000 coins.

Additionally, by progressing through certain stages, you can earn bonus coins with "Lagegus." It's easy to advance to Stage 3, and the Stage 3 bonus coins increase significantly to 100,000 coins. Prioritize using the coins you earn to level up "Tap Power" in "Boost" to further increase tap efficiency.

---

## GET BONUS COINS WITH "DAILY BONUS."

By logging into **"FUJIYAMA TAP"** every day, you can get daily bonuses.

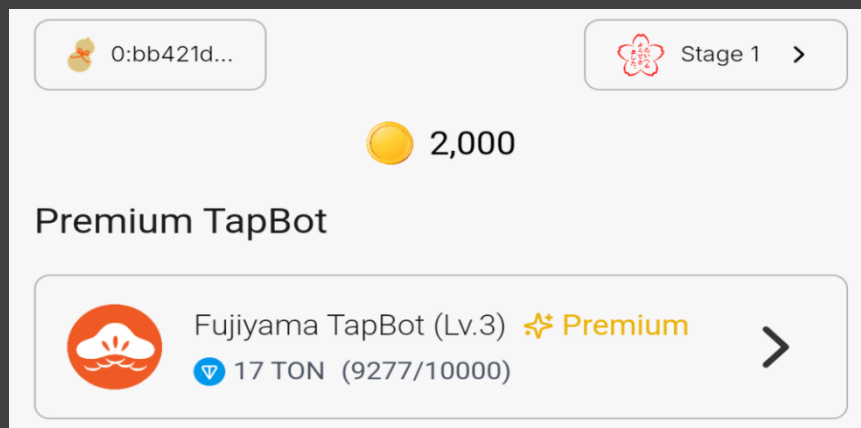

**"FUJIYAMA TAP"** resets at 0 AM UTC. By logging in every day, you can earn consecutive login bonuses.

---

## PURCHASE THE OFFICIAL AUTO-TAP FEATURE (TAPBOT)

**"FUJIYAMA TAP"** officially offers an auto-tap feature. It allows you to earn FUJIYAMA coins automatically without tapping the screen. Since it is an official auto-tap feature, you can earn FUJIYAMA coins even if the app is not open or the phone is turned off.

Currently, you can purchase the "Premium TapBot" for 20 TON (approximately \$100 as of January 1, 2025) with limited availability of 10,000 units. If you can buy the auto-tap feature for approximately \$100, it is worth considering.

The coin-earning power of this auto-tap feature (TapBot) is remarkable, allowing you to reach Stage 4 (500,000 coins) in just one day. By progressing through stages and increasing Tap Power, you can further exponentially increase your daily coin earnings.

---

## EXCHANGE COINS FOR FUJIYAMA TOKENS

The Token Generation Event (TGE) and token AirDrop are scheduled for March 2025, so the coin-to-token exchange feature has not been released yet. For now, it is advisable to accumulate as many coins as possible in preparation for the release.

## 1-6 HOW TO PURCHASE THE TAPBOT

The coin-earning power of this auto-tap feature (TapBot) is remarkable, allowing you to reach Stage 4 (500,000 coins) in just one day and Stage 5 (1,000,000 coins) in a few days. By progressing through stages and increasing Tap Power, you can further exponentially increase your daily coin earnings.

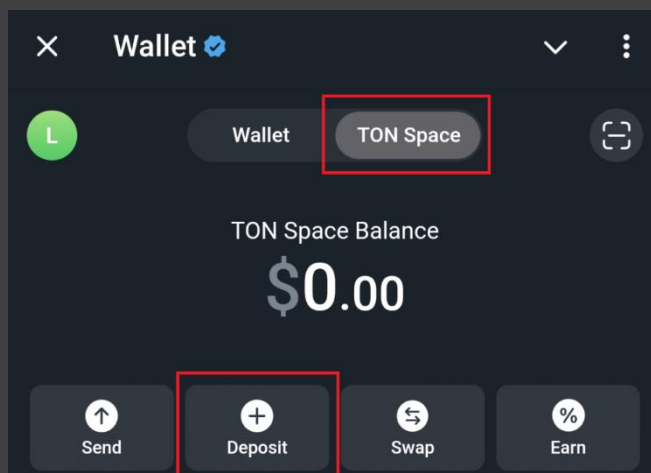

---

### 1-6-1 PURCHASE TONCOIN (TON) FROM A CRYPTOCURRENCY EXCHANGE

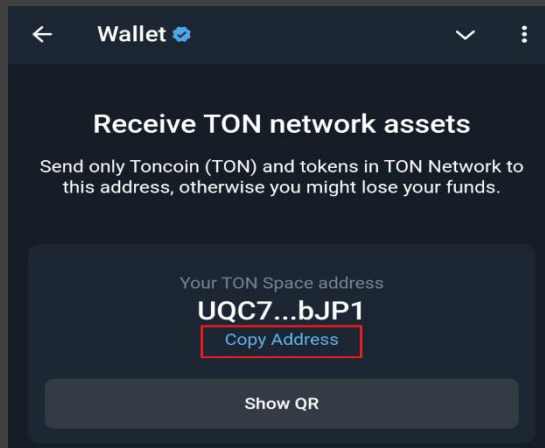

You can send TON to Telegram using the transfer function of a cryptocurrency exchange.

① Press the Telegram homepage and tap "Wallet."

② Select "TON Space" and tap "Deposit."

③ Tap "Copy Address" on the displayed screen to save the information to your device's clipboard.

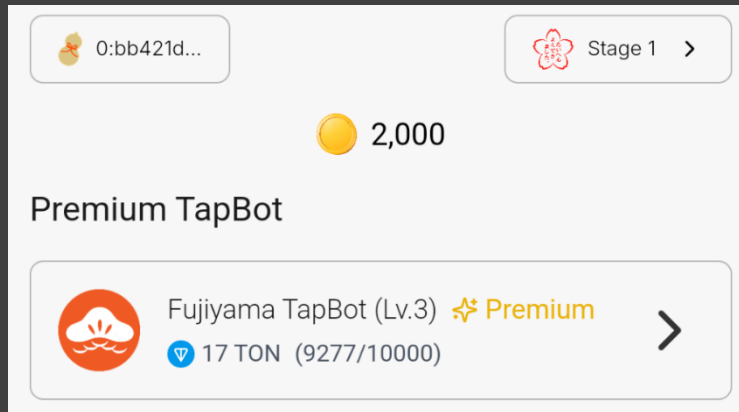

④ At the cryptocurrency exchange, enter the copied address information as the TON transfer destination address and proceed with the transfer. If prompted to enter an additional tag, leave it blank or enter "0."

---

## 1-6-2 PURCHASE THE OFFICIAL AUTO-TAP FEATURE (TAPBOT)

Return to the "Boost" menu in ["FUJIYAMA TAP"](#) and tap "Premium TapBot."

Follow the on-screen instructions to complete the purchase of the official auto-tap feature (TapBot).

When you restart ["FUJIYAMA TAP,"](#) if the following screen is displayed, you can confirm the validity of the official auto-tap feature.
